# Importance of presenting the need and innovation of the project in a well-founded manner

- + The proposal appropriately discusses the background and the rationale of the project, with good support of the timeliness and relevance of the specific thematic area.
- + It also very well discusses the overall aims and the specific objectives of the project, clearly demonstrating their relevance in relation to the Erasmus Mundus Design Measures.
- + There is good elaboration and clear evidence that the project would contribute to the objectives of the Call

# Importance of naming certain future partners at the time of submission

- + The demand for the planned joint Master programme is well-substantiated, and the need for an international approach represented by the partners is justified
- + The proposal explains in detail the good partners' strategy to prepare the envisaged Master programme.
- + The proposal very clearly demonstrates that this project appropriately builds on the results and acquired experience of past and current courses and activities carried out **by the partner institutions** in the targeted field.

# Importance of obtaining a certain amount of commitment from the future partners beforehand

- + The outlines of the Master programme confirm that the **partners have a clear concept** of the programme to be designed.
- + The composition of the partnership gathering institutions from programme countries and overseas.
- + There is clear information that the partner universities have been working together for many years, collaborating on different levels.
- + The complementarity in expertise and capacity of the participating HEIs is convincingly demonstrated

# Importance of cooperating with various departments within the university and external advice

JKU International Office

Departments with experience in joint programs with FH

## External Advice

Mag. Martina Friedrich OeAD-GmbH – Austria's Agency for Education and Internationalisation

# Importance of advanced investigation of the European Approach for Quality Assurance

+ Accreditation of the envisaged programme is sufficiently discussed.

+ There is a clear commitment that the European Approach for Quality Assurance of Joint Programs and Standards for Quality Assurance of Joint Programmes will be respected in the design process of the new Master programme.

# Importance of outlining the main features of the planned curriculum

-  The proposal identifies a series of activities that are well-connected to the production of the envisaged project outputs.  
Overall, there is good evidence that the project would ensure a jointly designed and well-integrated curriculum.
-  The outlines of the proposed Master programme are promising, they confirm that the partners have a clear concept of the programme to be designed
-  Little information is revealed on the envisaged new courses
